

Please reject NABs petition 04-160. We need a reliable source of broadcasting in this country.

We travel a lot & there are a tremendous amount of places where you can not receive normal, static free broadcasting. It's beneficial to have as you don't know always know the local radio stations in an urban area to pick up traffic reports quickly.

Ppeople who live in areas where they cannot receive any radio services and little television shouldn't have to pay large fees for dish tv's etc. to be able to have accurate up-to-date weather reports, their lives may depend on knowing about tornados, flooding, etc.

Satellite radio has been one of the best things to come along! Don't change it for a special interest group. Maybe some of the other stations will get rid of the junk that they have on theirs!
